*online option
Siena’s Baldwin Nursing Program embraces the College’s core Franciscan values to create lifelong learners, compassionate leaders and innovative professionals. The nursing curriculum is based on the principles of Dr. Jean Watson’s *Theory of Human Caring*, which builds upon the Franciscan values to create a rich ethical, moral and philosophical foundation for our program and our profession.

The caring science teaching-learning environment focuses on mindful learning, the importance of self-care and creates an authentic environment at Siena that is:

- co-created by the faculty and students
- respectful of each student’s unique lived experiences
- safe, caring and nonjudgmental
- engaging through dialogue and inquiry
- supportive of transformative self-directed learning
- creative
- active in student-centric learning and reflection
