

STUDYING ABROAD AS A BIOLOGY B.A. MAJOR

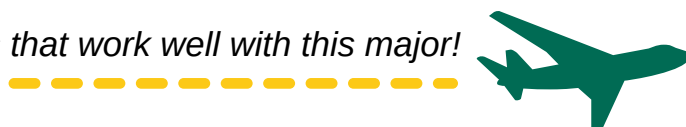

Study abroad enables biology students to examine global trends in healthcare and biological research, study at world-renowned universities, pursue academically and professionally-focused internship and research opportunities, and so much more!

MAJOR COURSES ABROAD

Students in the Biology B.A.-Albany Medical Program cannot take science coursework abroad for major credit. Any science courses taken abroad will count as general electives. Students should therefore prioritize taking major biology, chemistry, math, and physics at Siena.

Students can complete humanities courses abroad (such as philosophy or religion) as well as Core requirements including, but not limited to: CDA (Creative Arts), CDS (Social Sciences), and Franciscan Core (CFD, CFH, CFJ).

Check out possible study abroad locations that work well with this major!

STUDY ABROAD LOCATIONS

The following study abroad locations offer excellent science and humanities courses for Biology B.A. students:

Universidad Católica de Valencia (Valencia, Spain)

Coursework includes:

- *Stem Cells: Origin & Practical Applications*
- *Medicine & Health in Literature & Film*
- *Ethics & Professional Ethics*

DIS (Copenhagen, Denmark)

Coursework includes:

- *Medical Biotechnology & Drug Development*
- *Healthcare Systems: A Comparative Approach*
- *Impact of Epidemic Disease Upon European History*

Queen's University (Belfast, Northern Ireland)

Coursework includes:

- *Coastal & Oceanic Biology*
- *Understanding Northern Ireland: History, Politics & Anthropology*
- *Moral Theories*
